

Making a Lid Guitar

Activity for ages 6+. Adult supervision recommended.

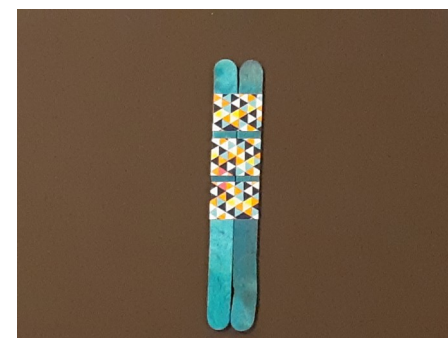

Step 1:

Carefully stretch **rubber bands** around the center of a **plastic drink lid**.

Step 3:

Use **popsicle sticks** to create the neck of your guitar. You can use one larger stick, or two smaller ones together. Decorate as you like - we've used **washi tape** here.

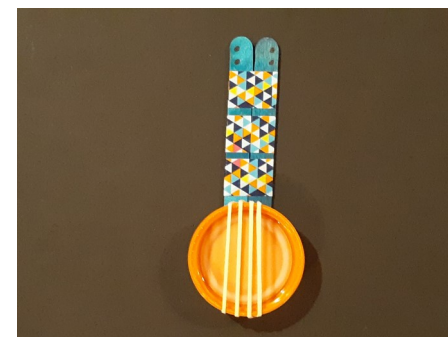

Step 2:

Secure rubber bands on the back of the lid using **duct tape**.

Step 4:

Use duct tape to tape the guitar body to the neck. Use **markers** to create the tuning pegs at the end of the neck.

Gently strum the guitar to make your music!
